Step 4 Click on **SETUP** tab, then Click on **INTERNET** on the left hand side, then Click on **Manual Internet Connection Setup**.

The screenshot shows the D-Link router's web interface. At the top is the D-Link logo. Below it is a navigation bar with tabs: DIR-868L, SETUP (highlighted), ADVANCED, TOOLS, STATUS, and SUPPORT. On the left is a sidebar menu with options: INTERNET (highlighted), WIRELESS SETTINGS, NETWORK SETTINGS, PARENTAL CONTROL, STORAGE, MEDIA SERVER, IPV6, and MYDLINK SETTINGS. The main content area is titled 'INTERNET CONNECTION' and contains two sections: 'INTERNET CONNECTION SETUP WIZARD' and 'MANUAL INTERNET CONNECTION OPTION'. The wizard section has a button labeled 'Internet Connection Setup Wizard'. The manual option section has a button labeled 'Manual Internet Connection Setup' which is circled in red. On the right side, there is a 'Helpful Hints...' section with bullet points and a 'More...' link.

Step 5 By default the router has is **Wireless Router**. You need change it to **Wireless AP**.

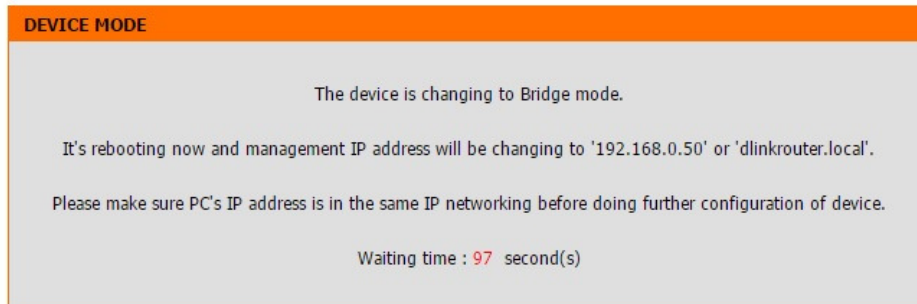

Step 6 Then click on save settings to continue

The screenshot shows the 'BRIDGE MODE' section of the router's setup page. It contains the text 'Use this to disable NAT on the router and turn it into an Bridge mode.' Below this is a dropdown menu with four options: 'Wireless Router', 'Wireless AP' (highlighted with a red circle), 'Wireless Bridge', and 'Wireless Repeater Extender'. Below the dropdown is the 'INTERNET CONNECTION TYPE' section, which contains the text 'Choose the mode to be used by the router to connect to the Internet.' and a label 'My Internet Connection is :' followed by a dropdown menu showing 'Dynamic IP (DHCP)'.

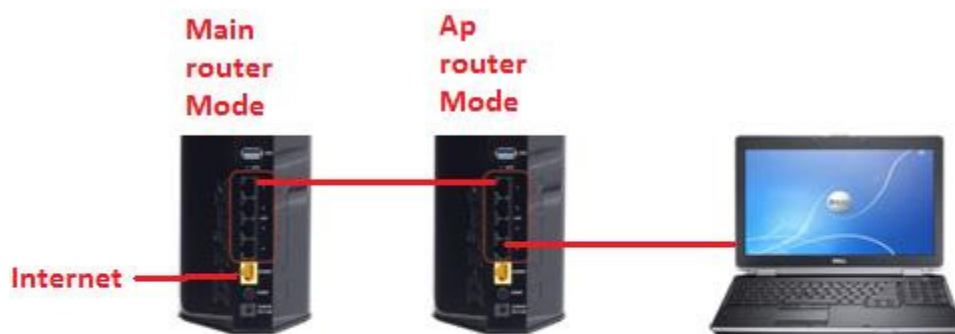

D-Link® Technical Support Setup Procedure

Step 7 It will reboot the router

Step 8 Make sure **NO** Network Cable is plugged into **INTERNET PORT**

Step 9 Connect an Ethernet cable in one of the LAN ports of the AP router and connect it to main router. Do not plug anything into the Internet (WAN) port of the router into an AP. Use the LAN ports only.
